# STATISTICS OF FARMER COOPERATIVES

1963-64

GENERAL REPORT 134  
BY BRUCE L. SWANSON

FARMER COOPERATIVE SERVICE  
U.S. DEPARTMENT OF AGRICULTURE

FARMER COOPERATIVE SERVICE  
U.S. DEPARTMENT OF AGRICULTURE  
WASHINGTON, D.C. 20250

Joseph G. Knapp, Administrator

The Farmer Cooperative Service conducts research studies and service activities of assistance to farmers in connection with cooperatives engaged in marketing farm products, purchasing farm supplies, and supplying business services. The work of the Service relates to problems of management, organization, policies, merchandising, product quality, costs, efficiency, financing, and membership.

The Service publishes the results of such studies; confers and advises with officials of farmer cooperatives; and works with educational agencies, cooperatives, and others in the dissemination of information relating to cooperative principles and practices.

**July 1966**

Acknowledgment is made to Jane H. Click and Elizabeth J. Simmons for their substantial contribution in the analysis of material necessary for the preparation of this report.

## HIGHLIGHTS

The combined gross volumes of marketing, farm-supply, and related-service cooperatives totaled \$19.3 billion in 1963-64. This was an increase of 5 percent over the total gross volume of \$18.3 billion in 1962-63. The total combined net volumes for 1963-64 amounted to \$14.4 billion, an increase of 3.9 percent over the net volume figure of \$13.8 billion for 1962-63. (The net volume figure does not include intercooperative business.)

The three high ranking States--California, Minnesota, and Iowa--together accounted for 23.3 percent of the total net combined volume of farmer cooperatives.

Marketing by cooperatives in 1963-64 showed a gross volume of \$14.6 billion, an increase of 4.8 percent over the \$13.9 billion gross in 1962-63. The net volume of farm products marketed amounted to \$11.2 billion in 1963-64, an increase of 3.7 percent over the \$10.8 billion in the previous year.

One-fourth of the net volume of farm products marketed by cooperatives originated in California, Minnesota, and Texas--the three leading States.

The gross volume of \$4.4 billion in farm supplies handled by farmer cooperatives in 1963-64 represented an increase of 6.0 percent over the \$4.1 billion farm-supply gross in 1962-63. Net farm-supply volume amounted to \$2.8 billion in 1963-64, an increase of 4.7 percent over the \$2.7 billion in net volume of farm supplies handled by cooperatives during the previous year.

Iowa ranked first in net volume of farm supplies handled by cooperatives, followed by Minnesota, second, and New York, third, with one-fifth of the net volume in these three States.

The \$313.1 million receipts in 1963-64 for related-services performed by cooperatives (services related to marketing farm products or purchasing farm supplies) represented a 3-percent increase over the \$303.3 million related-service receipts in 1962-63.

Texas, Kansas, and California led in receipts for services performed by cooperatives in 1963-64.

The total number of farmer cooperatives decreased by 60 from 8,907 in 1962-63 to 8,847 in 1963-64. Reorganizations involving mergers, consolidations, and acquisitions primarily account for the decrease in the total number of cooperatives. These reorganizations have been made largely for the purpose of improving operations and expanding services to meet the changing needs of farmer patrons.

Minnesota continued to lead in total number of cooperatives, while Wisconsin was second and Iowa, third.

The total number of memberships in farmer cooperatives decreased from 7,218,750 in 1962-63 to 7,079,500 in 1963-64, a decline of 1.9 percent. The steadily declining number of farmers in the United States is primarily responsible for the continuing downward trend in cooperative membership.

The leading State in total memberships in 1963-64 is Minnesota, followed by Illinois and Iowa.

Of the 8,847 farmer cooperatives included in the 1963-64 survey, 94 percent provided information on their operations.

# Statistics of Farmer Cooperatives, 1963-64

by Bruce L. Swanson  
History and Statistics Branch  
Management Services Division

Every other year, beginning with the 1961-62 statistical report, Farmer Cooperative Service presents its annual survey of the number, membership, and business volume of farmer cooperatives in condensed format. This 1963-64 survey report is the second in

the condensed series. Limited in size and scope, it provides tabulations that are essential for maintaining continuity of data. Detailed information on the number of cooperatives and their membership by State, commodity, and functional type is included. The report also contains information on the dollar-volume statistics of cooperatives classified by location and type.<sup>1</sup>

## Cooperative Business

In 1963-64, the combined gross volume of business of 8,847 marketing, farm-supply, and related-service<sup>2</sup> cooperatives amounted to almost \$19.3 billion (table 1). This was an increase of 5 percent over the \$18.3 billion gross reported in 1962-63.

The combined net volume of business amounted to almost \$14.4 billion. Included in this amount were \$11.23 billion for farm products marketed, \$2.83 billion for farm supplies purchased, and \$0.31 billion for services rendered to patrons. The net amount, which excludes intercooperative business (business between cooperatives), was almost \$4.9 billion in 1963-64. The net volume of \$14.4 billion in 1963-64 was an increase of 3.9 percent over the net volume of \$13.8 billion in 1962-63.

Gross and net volumes of business for marketing, purchasing, and service activities

are shown in table 1 for each survey year, beginning with 1950-51. The 1963-64 totals exceeded comparable totals reported in all previous surveys.

Gross volume of farm products marketed by cooperatives increased from \$13.9 billion in 1962-63 to \$14.6 billion in 1963-64, an increase of 4.8 percent. The net volume of farm products marketed amounted to \$11.2 billion in 1963-64 and accounted for 78.1 percent of the total net volume of cooperatives. The 1963-64 net marketing volume represented an increase of 3.7 percent over the \$10.8 billion net for the previous year. This increase in net volume of farm products marketed resulted primarily from increases in the dollar volumes reported for cotton products, fruits and vegetables, grain, nuts, and sugar products.

---

<sup>1</sup> Classification of cooperatives and procedures for obtaining information are covered in the Appendix of "Statistics of Farmer Cooperatives, 1962-63," FCS General Report 128, July 1965.

---

<sup>2</sup> Related services include trucking, storage, grinding, drying, and similar services affecting the form, quality, or location of farm products and supplies handled by cooperatives. These do not include credit, electrical, or telephone services; dairy herd improvement; artificial breeding; or other types of services not directly related to marketing or purchasing activities.

<sup>1</sup> Services related to marketing or supply purchasing but not included in the volumes reported for these activities.

<sup>2</sup> For years prior to 1950-51, see appendix table 7, FCS General Report 128. Data for prior years are not entirely comparable due to revisions in statistical procedures in 1950-51.

<sup>3</sup> Preliminary.

In 1963-64, the gross volume of all farm supplies handled by cooperatives amounted to \$4.4 billion, a 6-percent increase over the \$4.1 billion gross in 1962-63. The net farm-supply volume of \$2.8 billion accounted for 19.7 percent of the total net volume in 1963-64. This \$2.8 billion net volume was a 4.7-percent increase over the \$2.7 billion reported in 1962-63. Increases in net volumes of feed, fertilizer, petroleum products, and seed largely accounted for this rise.

The volume of services handled by all types of cooperatives amounted to \$313 million in 1963-64, a 3-percent increase over the 1962-63 volume of \$303 million. Service receipts represented 2.2 percent of the total net volume in 1963-64.

Table 2 shows the dollar volume of major commodities handled in 1963-64 and the number of cooperatives handling each commodity.

Table 2.--Estimated cooperative business classified by products marketed, supplies purchased, and services provided, 1963-64<sup>1</sup>

<sup>1</sup> Preliminary.

<sup>2</sup> Number of cooperatives handling each commodity group is computed as a percentage of the total number of 8,847 cooperatives listed.

<sup>3</sup> Includes coffee, forest products, fur pelts, hay, hops, seed marketed for growers, nursery stock, tung oil, and other farm products not separately classified.

<sup>4</sup> Because many cooperatives do more than one type of business, these totals are less than the number that would be obtained by adding the number of cooperatives handling individual items or performing individual services.

<sup>5</sup> Includes plant equipment, automotive supplies, hardware, chicks, and other supplies not separately classified.

<sup>6</sup> Charges for services related to marketing or purchasing but not included in the volume reported for these activities.

An estimated 69.5 percent of the 8,847 cooperatives in the survey, or 6,152 cooperatives, marketed farm products in 1963-64. These included 5,374 cooperatives that primarily marketed farm products; 767 cooperatives that primarily handled farm supplies; and 11 service cooperatives primarily performing trucking, storage, or other services related to marketing farm products or purchasing farm supplies. Forty-seven marketing cooperatives that were either newly organized or temporarily inactive are not included.

Farm supplies were handled by 6,872 cooperatives in 1963-64. These organizations represented 77.7 percent of the total number of cooperatives in the survey. Included were 3,222 cooperatives that primarily handled farm supplies and 3,574 marketing and 76 related-service cooperatives that handled farm supplies as a sideline activity. Four farm-supply cooperatives that were either newly organized or temporarily inactive are not included.

In 1963-64, 5,364 cooperatives of all types, or 60.6 percent of the total, performed one or more services related to farm-product marketing or farm-supply purchasing. These include 188 cooperatives primarily performing service activities such as trucking, storage, drying, and similar services; 1,630 farm-supply cooperatives; and 3,546 marketing cooperatives (which includes cotton-ginning, livestock-trucking, and rice- and fruit-drying cooperatives). Twelve related-service cooperatives that were either newly organized or temporarily inactive are not included.

These figures indicate that 66 percent of all marketing cooperatives handled one or more types of farm supplies in 1963-64, and 65 percent provided specialized related services such as cotton ginning and livestock trucking; or general related services such as storage, grinding, and drying. Of the farm-supply cooperatives, 24 percent marketed farm products, and 51 percent performed related services for their patrons. An estimated 6 percent of

the related-service cooperatives marketed farm products for their patrons, and 38 percent handled farm supplies in 1963-64.

## Local and Regional Volumes

Table 3 shows the estimated volumes of specified commodities marketed by regional and local cooperatives. Local cooperatives accounted for more than \$4.9 billion of the net volume of farm products marketed in 1963-64, or 44 percent of the total. Regional cooperatives accounted for \$6.3 billion net volume, or 56 percent of the total.

Local cooperatives accounted for a major portion of the total net marketing volume for the following commodities: Fruits and vegetables, 56.1 percent; grain, soybeans, and soybean products, 88.1 percent; and miscellaneous farm products, 92.1 percent.

Of the total gross marketing volume, \$3.3 billion, or 22.8 percent, represents the volume of marketing business between cooperatives.

The estimated gross and net volumes of farm-supply purchases handled by local and regional cooperatives are shown in table 4. Local cooperatives accounted for almost \$2.2 billion, or 76.7 percent, of the total net supply volume (\$2.9 billion). Regional cooperatives accounted for \$658.4 million, or 23.3 percent, of the total net supply volume.

The difference between the total net and gross volumes indicates that intercooperative volume in farm supplies amounted to \$1.6 billion, which is 35.6 percent of the total gross supply volume (\$4.4 billion).

Local cooperatives accounted for 74.6 percent of total service receipts, or \$233.8 million, and regional cooperatives for 25.4 percent, or \$79.3 million.

Table 3.--Estimated marketing business of local and regional cooperatives, by specified commodities, 1963-64<sup>1</sup>

## Geographic Areas

The estimated volume of farm products marketed by cooperatives in 1963-64 is shown by States and geographic regions in table 5.

The East North Central and West North Central Regions combined accounted for 45 percent of the total net volume of farm products marketed.

Table 5. - Estimated gross and net sales<sup>1</sup> of marketing, farm-supply, and related-service cooperatives<sup>2</sup> by commodities, geographic regions, and States, 1963-64 -

Geographic regions and States	Beans and peas (dry edible)					Cotton and cotton products					Dairy products				
	Estimated number of cooperatives handling <sup>1</sup>			Value of sales		Estimated number of cooperatives handling <sup>1</sup>			Value of sales <sup>2</sup>		Estimated number of cooperatives handling <sup>1</sup>			Value of sales	
	Head- quar- ters in State	Head- quar- ters out of State	Total in State	Gross (includes intercoop- erative business)	Net (excludes intercoop- erative business)	Head- quar- ters in State	Head- quar- ters out of State	Total in State	Gross (includes intercoop- erative business)	Net (excludes intercoop- erative business)	Head- quar- ters in State	Head- quar- ters out of State	Total in State	Gross (includes intercoop- erative business)	Net (excludes intercoop- erative business)

See next page for footnote references.

1. The volume of products marketed is allocated to the State in which they originate and the volume of farm supplies is allocated to the State in which they are sold.
2. Includes independent local cooperatives, federations, and centralized cooperatives.
3. Preliminary data covering operations of cooperatives whose fiscal years ended during the period July 1, 1963, through June 30, 1964, with limited exceptions.
4. The total number of cooperatives handling each commodity within a State may include only cooperatives headquartered in the State, only cooperatives headquartered in other States, or a combination of both. Number of cooperatives handling a commodity includes those performing specific services on the commodity, such as cotton-ginning cooperatives, live-stock-trucking cooperatives, rice-drying cooperatives, and fruit-drying cooperatives. (Income for these specific services is included with service receipts.)
5. Includes the value of commodities marketed by cooperatives under price support programs in 1963-64. Cooperative business volume is influenced by the extent to which patrons participate in these programs.
6. Included in the combined total dollar volume of all farm products marketed, farm supplies handled, and related services provided, in order not to reveal separate volume data for an individual association.
7. Dollar volume for commodity allocated to States of origin.
8. Includes the volume of a statewide federation of county wool pools which is responsible for selling all wool in the pools. Payment is made by the federation to the pool manager who is responsible for payments to the individual wool growers.
9. The volume of a Hawaiian sugar cooperative headquartered in California is included in the dollar volume of California.
10. Includes forest products, fur pelts, hay, hops, nursery stock, tung oil, coffee, and other farm products not separately classified.
11. Less than \$500.
12. Includes plant equipment, automotive supplies, hardware, chicks, and other supplies not separately classified.
13. These combined gross and net totals will not, in all cases, equal the sum of individual commodity totals or the sum of the totals for marketing, farm supplies, and related services, since some of the individual and group totals have been adjusted in order not to reveal volume data for individual associations.
14. Receipts for services related to marketing and purchasing activities, but not included in the volumes reported for these activities.
15. Because many cooperatives do more than one type of business, these totals are less than the number that would be obtained by adding the number of cooperatives marketing individual products, handling individual supplies, or providing individual services.

The estimated volume of farm supplies purchased by patrons from marketing, farm-supply, and related-service cooperatives in 1963-64 is shown by States and geographic regions in table 5. The East North Central and West North Central Regions combined accounted for almost 54 percent of the supplies purchased in 1963-64.

Table 5 also classifies the volume of related-service receipts by States and geographic regions. The West North Central Region ranks first with service-receipt volume amounting

to more than \$102 million, which is 32.6 percent of the total volume of service receipts reported by cooperatives.

In net volume of combined marketing, supply, and service receipts, California continued in first place with \$1.57 billion, or 11 percent of the total net volume. Minnesota stayed in second place with \$935 million net volume, or 7 percent of the total; and Iowa remained in third place with \$845 million net volume, or 6 percent of the total.

## Cooperatives and Memberships

The 1963-64 survey included a total of 8,847 marketing, farm-supply, and related-service cooperatives compared with 8,907 in the 1962-63 survey. Memberships in these cooperatives totaled 7,079,500 compared with 7,218,750 in the previous survey.

### Number of Cooperatives

The 8,847 marketing, farm-supply, and related-service cooperatives in the 1963-64 survey represent a decrease of 60 associations, or 0.7 percent from the previous year.

Reorganizations involving mergers, consolidations, and acquisitions account in part for the decrease in the total number of cooperatives. Reorganization is generally for the purpose of improving operations and expanding services to meet the changing needs of farmer patrons.

Table 6 shows that the total of 8,847 cooperatives included 5,421 that primarily marketed farm products (marketing cooperatives), 3,266 whose major operation was handling farm production supplies (farm-supply cooperatives), and 200 related-service cooperatives.

Table 6.--Number and percentage of marketing, farm-supply, and related-service cooperatives, 1950-51 to 1963-64

1962-63.....	5,502	61.8	3,211	36.0	194	2.2	8,907	100.0
1963-64 <sup>2</sup> ....	5,421	61.3	3,226	36.5	200	2.2	8,847	100.0

<sup>1</sup> For years prior to 1950-51, see appendix table 5, FCS General Report 128.

<sup>2</sup> Preliminary.

Comparison of 1963-64 with 1962-63 shows marketing cooperatives decreased from 61.8 to 61.3 percent of the total number of cooperatives; farm-supply cooperatives increased from 36.0 to 36.5 percent; and related-service cooperatives remained at 2.2 percent.

In analyzing the percentages in table 6, please note that in each annual survey some cooperatives are reclassified because of changes in the commodity type representing the major portion of their dollar volume.

In table 7, cooperatives are classified according to the commodity that consistently represents the largest percentage of their dollar volume of business.<sup>3</sup>

Minnesota continued to lead in total number of cooperatives with 1,122; Wisconsin was second with 658; and Iowa third with 567. These figures represent decreases for each of the three States.

---

<sup>3</sup>This method is discussed in FCS General Report 128, appendix, p. 68.

See next page for footnote references.

1. Includes independent local cooperatives, federations, and centralized cooperatives.
2. Includes members (those entitled to vote for directors) but does not include non-voting patrons. (There is some duplication in these membership figures because many farmers belong to more than one cooperative.)
3. Preliminary data covering operations of cooperatives whose fiscal years ended during the period July 1, 1963, to June 30, 1964, with limited exceptions.
4. Includes soybeans, soybean meal, and soybean oil.
5. The cooperative with which this membership is affiliated has been counted in the State in which the cooperative maintains its headquarters.
6. No individual memberships.
7. Cooperatives that are temporarily inactive because of crop failures or other reasons are included.
8. Cooperatives performing specific services on a commodity are included. Incorporated local associations of a federation that performs the actual marketing or processing are counted.
9. Membership of cooperatives marketing nuts fluctuates from year to year and is affected by the extent to which producers participate in price support or stabilization programs.
10. Includes sugar, sugarcane, sugar beets, honey, maple syrup, molasses, and sorghum.
11. Includes forest products, fur pelts, hay, hops, nurse stock, tung oil, coffee, and other farm products not separately classified.
12. Member-patrons.
13. Includes a statewide federation of county wool pools. Payment is made by the federation to the pool manager who is responsible for payment to the individual wool growers.
14. Cooperatives providing services related to marketing or purchasing activities.
15. Includes incorporated local cooperatives without facilities that are affiliated with an operating regional cooperative.

## Number of Memberships

Memberships in marketing, farm-supply, and related-service cooperatives in the United States totaled 7,079,500, a decrease of 1.9 percent from the previous year (table 8). The decrease is primarily a reflection of the declining number of farmers in this country. Many farmers were members of more than one cooperative and were counted two or more times; therefore, the total membership figure of 7,079,500 contains duplication that can not be eliminated with current reporting methods.

Membership figures often vary widely from year to year in those commodities that operate under price stabilization programs--particularly for cooperatives participating in the cotton, nut, and tobacco programs.

The variety of services performed by cooperatives also affects classification of members. For example, a member may use a cooperative to market only one of the farm products handled by the cooperative, or a member may use a cooperative classified in the marketing group only for purchasing one or more types of production supplies. The member's

business with the cooperative may not, therefore, be in the group that represents the cooperative's major business volume (which determines how the cooperative shall be classified in these statistics). His membership, however, will be included arbitrarily in that classification.

Minnesota continued in first place with 628,510 memberships (table 7). Illinois remained in second place with 452,415, and Iowa moved into third place with 423,045.

Table 9 shows the memberships in local and regional cooperatives classified by major group and commodities. Of the 8,847 cooperatives included in the 1963-64 survey, 8,079--or 91.3 percent--were local cooperatives. These local cooperatives had 4,367,490 memberships, or 61.7 percent of the total. Regional cooperatives represented 8.7 percent of the total number and accounted for 38.3 percent of the memberships.

The statistics in this report were based on current information furnished by 94 percent of the cooperatives included in the 1963-64 survey.

<sup>1</sup> Preliminary.

<sup>2</sup> Membership figures vary considerably due to cooperative participation in price stabilization programs, particularly in cotton, nuts, and tobacco. They are also affected by the number of reported members who may not be active patrons in a specific year.

<sup>3</sup> Includes bargaining cooperatives.

<sup>4</sup> Includes soybean marketing and processing.
